COMPASS SPEC SHEET

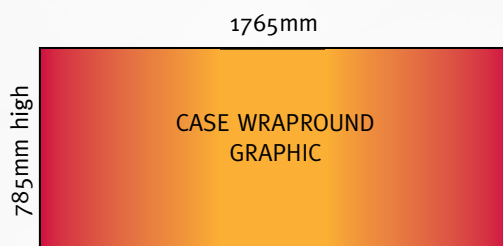

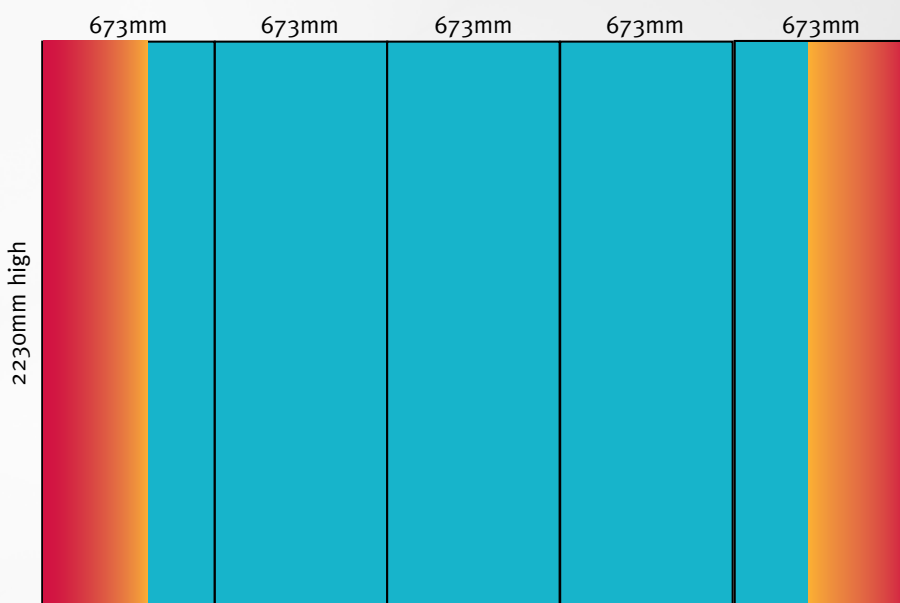

BREEZE 3X3 POP UP

COMPASS **Breeze** POP UP 3X3

Compass like artwork in Indesign, Illustrator and if necessary print ready PDF. If possible produce all artwork as a six page spread with 3mm bleed and at 1/4 finished size.

With a pop up it is best practice to avoid small copy across panel joints and be aware that the end panels curve back on themselves so logos far right and far left will be lost.

Scans should be in CMYK and we like files to be approx. 40 Mb per finished square metre. If, for example, you have a shot across four panels of the pop up the file size need to be approx. 240 Mb. Logos etc. are always best as a vector file such as illustrator EPS.

COMPASS **Breeze** POP UP

Avoid shaded red areas with important information such as logos and copy. These areas end up facing backwards.
